

KLOVE is a very important part of my daily life and provides an alternative to other formats on the radio. I don't believe that there is another one like it. It provides family friendly programming every day along with local and national news and events. If KLOVE were to be removed and replaced by LPFM stations there would be a definite void in this type of format (family friendly, positive music and news in their daily broadcast).

I believe that it is in the overall public interest to keep this station on the air as it provides a calming message and promotes good mental & emotional health with its positive message and music. I listen to the station on a daily basis and it is an important part of my morning routine to listen to KLOVE while getting ready for the day and then to listen to KLOVE while driving in my car. In these days of turmoil, war, road rage and general public uneasiness, KLOVE definitely helps to balance out these negatives with its positive message.

KLOVE is a welcome change from the normal radio format's news and music that is overwhelming negative and depressing. KLOVE offers balance to the bad news that we are deluged with on a consistent basis.

I enthusiastically support KLOVE and its continuation as a local presence on the radio dial and would not like to see it replaced with LPFM stations of unknown content.
